Professional Portfolio

LANGUAGE

- Italian - Native Speaker
- English - Proficient (IELTS C1)

CORE SKILLS

- Full Stack Development
- Frontend Architecture
- Backend API Design
- Databases & ORM
- DevOps & CI/CD
- On-Premises Deployment
- Real-time Applications
- System Design
- Agile Methodologies

ADDITIONAL SKILLS & CERTIFICATIONS

- Problem-Solving & Adaptability
- Cross-team Collaboration
- Leadership & Teamwork
- Certified Alpine Ski Instructor and Coach.

ABOUT ME

Software engineer with international academic background, experienced in building high-performance, mission-critical web applications in aerospace environments. Expertise in modern frontend frameworks, backend APIs, and on-premises deployments. Thrives in fast-paced, collaborative teams.

PROFESSIONAL EXPERIENCE

Full Stack Developer
ALTEC S.p.A., Torino, Italy — September 2024 - Present
Developing mission-critical web applications for the Lunar Mission Control Center (LMCC) and ExoMars program, supporting European space exploration operations.

- Building responsive UIs with **Vue.js**, **TypeScript**, PrimeVue, and **Tailwind CSS**
- Developing backend **REST APIs** using **NestJS** with Swagger, **PostgreSQL**, and ORM patterns
- Managing containerized deployments with **Docker** and **Kubernetes** in on-premises environments
- Maintaining **CI/CD** pipelines and **Git**-based workflows across multidisciplinary teams

EDUCATION

Master of Science in Computer Science — GPA: 4.0/4.0
University of Illinois at Chicago, USA — May 2025

Master's Degree in Software Engineering — 110/110 cum Laude
Politecnico di Torino, Italy — July 2025

Bachelor's Degree in Computer Engineering — 108/110
Politecnico di Torino, Italy — July 2023

ACADEMIC PROJECTS & APPLIED EXPERIENCE

Fanta F1 (Personal Project)
Independent — 2022 - Present
Developed and deployed a full-stack fantasy Formula 1 game with real-time race data processing, automated point calculations, and live rankings. Built responsive **React** frontend with dynamic **data visualization**. Implemented **Firebase** backend with scalable architecture. Demonstrates initiative, full product ownership, and end-to-end development skills.

LLM-Powered Code Generation System
University of Illinois at Chicago — Oct 2024 - July 2025
Master's thesis developing an **AI-powered** system that generates functional Python code using large language models with automated testing and iterative refinement.

Secure Web Application
Politecnico di Torino & University of Illinois at Chicago — Jul 2024 – Jan 2025
Designed a secure, **real-tim**e multiplayer web app with React, Node.js, and Express. Combined creative UI design with backend **security** in cross-cultural team collaboration.

PROGRAMMING LANGUAGES / FRAMEWORKS

- JavaScript / Typescript
- HTML/CSS
- Python
- Kotlin
- SQL / noSQL
- Bash
- C/C++
- Java

FRAMEWORKS & SOFTWARE

- React.js
- Vue.js
- Node.js / Nest.js
- REST APIs / Swagger
- Tailwind CSS
- Docker / Kubernetes
- PostgreSQL / MongoDB
- Git & GitLab CI/CD
- Linux
- Materia UI
